LEVERAGE

Clients may be able to borrow funds or may utilize various lines of credit and other forms of leverage in order to invest in financial securities. While leverage presents opportunities for increasing an investor's total return, it has the effect of potentially increasing losses as well. Any event which adversely affects the value of an investment may be magnified to the extent an investor is leveraged. The cumulative effect of the use of leverage by an investor in a market that moves adversely to such investor's investments could result in a substantial loss to the investor that would be greater than if the investor were not leveraged.
