Affiliate portfolios, use section templates, and add disclosures to your reports.

In this guide:

- Add portfolios
  - Affiliate portfolios to reports
- Use section templates
  - Create a section template
  - Edit a section template
  - Require section templates
  - Create a custom section
  - Delete a section template
- Add dynamic disclosures

- Troubleshooting
- More options

Before you begin

- You need permission to complete these workflows.

Add portfolios

Affiliate reports to portfolios

When you create a report, you'll select portfolios to affiliate with it. This process ensures you can use data for these portfolios in your report. It also means you can share reports with these portfolios and their contacts.

Create and affiliate a report to portfolios

1. Go to **Analysis & Reporting** > Search a portfolio.
2. On the **Reports** tab, click **Create report**.
3. Enter a **name** and choose a **time period**.
4. Select **portfolios** to affiliate with the report.
5. Click **Save**.

Keep in mind: A report's time period sets the end date for any attributes it uses. It also defines the date range for anything labeled "current time period." You can change the time period for a report by choosing specific columns.

Change the portfolios affiliated to a report

1. Go to **Analysis & Reporting** > Select a portfolio.
2. On the **Reports** tab, click the **three dot menu** to the right of the desired report.
3. Select **Settings** and adjust the affiliated portfolios.
4. Click **Save**.

Use section templates

You can create section templates from your global report settings in **Firm Administration**. Or from the **Report Editor** within the **Section Template Editor**.

One benefit of using **Firm Administration** is you'll see a list of all the section templates at your firm. This lets you assess what you have and don't have and create new templates based on that knowledge.

Create a section template

1. Go to **Firm Administration** > **Report settings**.
2. On the **Section templates** tab, click **+Create section template**.
3. Enter a **title** (this will appear in the table of contents). Optional: Enter a description.
4. Choose **Firm** or **Team** access > Click **Create**.
5. In the **Section Template Editor**, select a **portfolio** to link to your report.

Tip: When you set up a section template, make sure its paper size matches the paper size of the reports you'll use it in. Linked sections can only be added to reports of the same paper size.

Edit a section template

1. Go to **Firm Administration** > **Report settings**.
2. On the **Section templates** tab, click **Edit** (pencil icon) next to the desired section template.
3. In the **Section Template Editor:**
   - Click the **Settings gear icon** to change the title, description, access, and paper size.
   - Use the toolbar to add, edit, or remove elements like tables, charts, textboxes, and media.
   - Use the **right-side panel** to adjust table details, change formatting, and arrange content.
4. When you're done editing, click **Save**.

Tip: You can unlink section templates if you want to make a change to one report. That way, your changes won't impact the other reports using the section template.

Require section templates in all reports

You can require section templates in your reports. This ensures all your reports meet a defined standard of quality and consistency. It also makes them easier to maintain and update.

1. Go to **Firm Administration** > **Report Settings**.
2. On the **Section templates** tab, click the **gear icon** next to the desired template.
3. With **Firm access** selected, check the box to require this section in all reports.
4. Choose a **placement** > Click **Save**.

Tip: Cover pages, table of contents, and disclosures are commonly required templates.

Worth noting

- This only works for section templates available to your entire firm.
- Existing reports will automatically update to include the required template when next opened. Previously generated PDFs won’t show the change.
- You can remove the requirement by following the above steps. Just uncheck the “Require” box.
- To remove the template from existing reports, delete it or manually take it out of each report.

Create a custom section

1. In the **Report Editor**, click the **+** sign in the lower left-hand corner of the outline panel.
2. Under **Report Page or Custom Section**, choose a blank page or section.
3. **Drag and drop** the section in the outline panel to where you want it to appear in the report.

4. Click **Save**.

Note: Once created, you can edit your custom section just like you would a template. Then, save your custom section to the Template Library to reuse it later.

Delete a section template

Deleting a section template is permanent—you can't get it back. So before you delete it, ask yourself: "Do I really need to delete this, or do I just need to remove it from certain reports?"

1. Go to **Firm Administration** > **Report Settings**.
2. Click the **three-dot menu** next to the desired template and select **Delete**.
3. If the section template is still in use, you'll see a list of reports using it. Review each report to make sure deleting the section template won't cause any issues.
4. Click **Delete**.

Add dynamic disclosures

You can add disclosures to your reports automatically (we call them "dynamic disclosures"). These disclosures provide explanations or footnotes to your reports. They tell your clients about any filters you've used on tables, charts, or sections.

1. Go to **Firm Administration** > **Report settings**.
2. On the **General** tab, check the box next to **Dynamic disclosures**.
3. Click **Save**.

Worth noting:

- You can't change or hide dynamic disclosures from your reports.

- Once required, these disclosures will appear in all reports and future generated PDFs.
- To add disclosures in reports you've *already generated*, you'll need to re-run them.
- These disclosures will appear right below the table, chart, or section they explain.
- If a disclosure is too long, we'll shorten it to reduce visual clutter. Then add the full explanation to a "Disclosures" section at the end of the report.

If you need to add or change Client Portal disclosures, you'll need to contact **Addepar Support**. These often appear on the Client Portal sign-in page, Files tab, or under Investor views.

Troubleshooting

Getting stuck? Find the answers you need to fix common issues with reporting.

- Why doesn't my table data match my analysis views?
- When I edit a table, all my data is missing.
- Why can't I delete a section template?
- Why did my report fail to run?
- Why won't my headers and/or footers save?
