In this article:

- How to import data
- Template details
- Example

You can use the Import Tool to create and manage transactions in bulk. You can also create new investments when importing transactions.

You can download the Transactions Matrix to compare all transactions at once.

Download XLSX template
Download CSV template

To import data, you must have permission to access the in-app Import Tool. You also need permission to edit transactions and access the entities you update. If you want to modify transactions from a data feed, you need permission to edit online data.

> **Note**: Snapshots and valuations can be imported in the same file as transactions. To do so, add the columns required for a snapshot or valuation import to the transactions import template, and enter "snapshot", "valuation", or "snapshot/valuation" in their Type column.

How to import data

1. Prepare a file.
    1. Download the import template from this article. We recommend the XLSX template because it describes each column.
    2. Enter the necessary data into the template. You can remove data or columns that you don't need.
    3. Save the completed template as an XLSX or CSV file. Note that only the first tab of an Excel sheet can be imported.
2. Upload your data.
    1. In Addepar, go to **Import data** in the global navigation bar.
    2. Select the data type you're importing.
    3. Upload your XLSX or CSV file.
    4. If there are errors or warnings:
        1. Click **Download log** to see the errors and warnings in detail. You can also see the messages directly in Addepar.
        2. Update and save your file.
        3. Click **Replace file** to upload your new version.
3. Review the summary, then import your data.

You can see a record of each import in **Firm Administration > Import history**.

> **Note**: Use our Import Tool API to save time by automating your workflows.

Start with data from Addepar

Updating existing transactions via import will overwrite the entire transaction. To avoid losing any data in the process, be sure to include all of these columns.

1. In **Analysis & Reporting**, select a portfolio. If you're managing cost basis on multiple portfolios, use something firm-wide like **All households and clients**.
2. On the **Transactions** tab, edit the table to include these columns:
   1. Always: Vendor ID, Direct Owner Entity ID, Entity ID, Trade Date, Type, Units, Value, Currency
   2. If applicable: Comments, Description, Tag, Accrued Income, Affects Cost Basis, Affects Paid-in Capital, Affects Unfunded Commitments, Ex-Date, Is Cancellation, Paid to (from), Settle Date
   3. If you have fees: Counterparty fees, Entry and Exit Fee, External Broker Fee, Foreign Fee, General Fee, Internal Broker Fee, Market Fee, Market Tax, Matching/Confirmation Fee, Other Fee, Stamp Duty, Stock Exchange Fee, Stock Exchange Tax, Value Added Tax (VAT) Withholding Tax
   4. If you have distributions: Dividend Income, General Distribution, Interest Income, Ordinary Income, Recallable Amount, Return of Capital, Short Term Capital Gain, Unknown Capital Gain
3. Download the table.
4. Fill in your new data and import the file.

Template details

Include a row for each transaction you want to create or update in Addepar.

Column	How to use	Data in Addepar	Example
Direct Owner Entity ID	**Require one** The direct owner in the transaction. You only need one of these columns.	Direct Owner Entity ID in a transaction table	31129

		Entity ID or Direct Owner ID attributes	
Direct Owner Name		Direct Owner in a transaction table Original Name or Display Name attributes	Garcia Investment Account
Direct Owner Model Type	Optional The direct owner's model type.	Model Type attribute	Holding Account
Asset Entity ID	**Required** The owned asset in the transaction. This is usually an investment, but it can also be something else, like an account or legal entity. An asset is any owned entity in Addepar. To create a **new** asset, enter its name and model type. To identify an **existing** asset, enter its entity ID or another identifier. In addition, model type is usually	Entity ID attribute	23409
Asset Name		Security in a transaction table Original Name or Display Name attributes	Apple

Asset Model Type	optional, but is required for custom assets that are using an identifier other than entity ID.	Security Model Type in a transaction table Model Type attribute	Custom Asset
Asset CUSIP		CUSIP attribute	37833100
Asset ISIN		ISIN attribute	US0378331005
Asset SEDOL		SEDOL attribute	2046251
Asset Ticker Symbol		Ticker Symbol attribute	AAPL
Asset Ownership Type	**Only use for custom assets** The custom asset's ownership type. You need to use this column if you're creating a new custom asset or identifying one by name.	Ownership Type attribute	Share Based

Type	**Require all** The transaction's type, the date it occurred, and its value. The trade date can use Excel's built-in date formatting or you can enter it according to your firm's default.	Type in a transaction table Transaction Type attribute	Buy
Trade Date		Trade Date attribute	01-27-2024 *if your firm uses MM-DD-YYYY*
Value		Value in a transaction table Transaction Value attribute	20000
Units	**Only use for share-based assets** The transaction's number of shares.	Units or Transaction Units in a transaction table Transaction Units attribute	10

Currency	Optional The transaction's currency as a three-letter abbreviation. Only use this column if you want the currency to be different from the default. When the asset is **new**, currency defaults to the firm's default currency if left blank. When the asset **exists**, currency defaults to the asset's currency if left blank.	Currency attribute	CAD
Paid to (from) Cash Position Name	**Required for cash transactions,** optional for all others The position the cash transaction is paid to or paid from. Usually, its name is "Cash".	Paid to (from) in a transaction table Position attribute	Cash
Paid to (from) Cash Direct Owner Entity ID	**Required for cash transactions whose cash position has a different direct owner,** optional for all others The direct owner of the cash position, if it's different from the transaction's direct owner. You only need one of these columns.	Cash position direct owner's Entity ID attribute	12977
Paid to (from) Cash Direct Owner Entity Name		Cash position direct owner's Original Name or Display Name attributes	Lee Investment Account

[Enter distribution type]	**Only use for distribution transactions** The distribution type(s) and amount. Create a column for each distribution type you need, using the distribution type as the column name. The sum of distribution amounts must equal the transaction's value.	Supported distribution details	*Name a column* "Return of Capital" *and enter* "10000"
Affects Adjusted Value	Optional, only use for private fund transactions Whether or not the transaction affects specific metrics. These columns are optional and default to "False" if left blank.	Affects Adjusted Value attribute	True
Affects Cost Basis/Paid-In Capital		Affects Cost Basis and Affects Paid-In Capital attributes	False
Affects Unfunded Commitments		Affects Unfunded Commitments attribute	True
Recallable Amount (Does Not Affect Paid-In)	Optional, only use for distribution transactions The amount that can be recalled by the distributor during a capital call. Use the column that specifies whether the recallable amount will impact paid-in capital. Note that recallable amounts aren't included in the total distribution amount.		100
Recallable Amount (Affects Paid-In)			500

Excluded from Adjusted Value	Optional, only use for distribution transactions The amount excluded from Adjusted Value.	-	100
Removed Entity ID	**Only use for corporate action transactions** The removed asset.	Entity ID attribute	64266
Removed Units or Received Value	**Only use for corporate action or foreign exchange transactions** For a **corporate action** transaction, this column is the number of units removed. Enter the units received in the "Units" column. For a **foreign exchange** transaction, this column is the received value. Enter the exchanged value in the "Units" column.		75

Secondary Currency	**Only use for transactions affecting multiple cash positions** The other currency and position.		EUR
Secondary Paid to (from) Cash Position Name	For a **contract** transaction, enter the outgoing currency and the position it's paid from. For a **foreign exchange** transaction, enter the bought currency and the position it's paid to.		EUR Cash
Secondary Paid to (from) Cash Direct Owner Entity ID	Optional, only use for transactions affecting multiple cash positions The direct owner of the secondary cash position. Only use this column if its owner is different from the Paid to (from) Cash Direct Owner Entity ID column, like contract transactions or foreign exchange transactions with a different cash owner.		43364
Accrued Income	Optional, only use for redemption transactions The amount of income accrued.	Accrued Income attribute	10

Ex-Dividend Date	Optional, only use for stocks with an ex-dividend date The stock's ex-dividend date. This column is usually used for dividend transactions. You can use Excel's built-in date formatting or enter the date according to your firm's default.	Ex-Date in a transaction table	01-27-2000 *if your firm uses MM-DD-YYYY*
Total Fees	Optional, only use for transaction types that support fees The transaction's fees. These columns are all optional and can only be used with certain transaction types like buys and sells. Enter the total amount as a number. Fees will be "General" type by default, but you can create columns for each fee type by naming the column with the fee type and entering an amount in each row.	Total Fee in a transaction table	100
[Enter transaction fee type]		Supported transaction fee types	*Name a column* "Foreign Fee" *and enter* "20"
Settlement Date	Optional The transaction's settlement or posted date. Both of these columns are optional. You can use Excel's built-in date formatting or enter the date according to your firm's default.	Settle Date in a transaction table Settlement Date attribute	01-28-2024 *if your firm uses MM-DD-YYYY*

Posted Date		Posted Date attribute	01-29-2024 *if your firm uses MM-DD-YYYY*
Transaction Order	**Only available if your firm allows users to put transactions in a custom order, and only for share-based assets** Indicates the transaction's order in the day. Enter "1" for the first transaction, "2" for the second, and so on. This is usually only used when tax harvesting in some regions.	Transaction Order in a transaction table	1
Description	Optional Annotation on the transaction. Descriptions can be 1,000 characters or less. Comments can be 4,000 characters or less.	Description in a transaction table Transaction Description attribute	Donation
Comment		Comments in a transaction table Transaction Comments attribute	Holiday season philanthropy

Tag *[number]*	Optional A label on the transaction. Tags can be new or existing and can be 255 characters or less. To add more than one tag to a transaction, create additional columns with numbered column names, like Tag 1, Tag 2, and so on.	Tag in a transaction table Transaction Tags attribute	Charitable gift *in a column named* Tag 1*, and* Tax deductible *in a column named* Tag 2
Vendor ID	**Only use to update an existing transaction** A transaction's ID. To create a **new** transaction with an **automatically-generated** ID, leave this column blank. To create a **new** transaction with a **custom** ID, enter a unique value. To identify an **existing** transaction, enter its vendor ID.	Vendor ID attribute	f8b1d61f-bd0a-4cf8-905d-1fb4c01679df
Cancellation	**Only use to mark a transaction as a cancellation** Indicates whether or not the transaction should be a cancellation. This defaults to "False" if left blank.	Is Cancellation attribute	True

Columns for common imports

Data imports accept a wide range of data, but you usually only need a few columns. Browse common use cases and see which columns each one requires.

Accepted column names

Data imports accept several names for most columns. This helps you continue importing without interruption when we update a template. To check a specific column name, go to this article.

Unsupported transaction types via import

Most transaction types can be imported, but there are a few exceptions:

- Transfer
- Account Tax
- Interest Income (Shares in Lieu of Cash)
- Acquisition
- Conversion
- Journal
- Lookthrough Adjustment (without indirect cashflows)

Example

The following examples could be imported as rows in a single file. We've divided them for clarity.

This import example would create a commitment and a contribution transaction for Priority Capital, a private equity asset owned by Living Trust ABC.

	A	B	C	D	E	F	G	H	I	J	K
1	Direct Owner Entity ID	Direct Owner Name	Direct Owner Model Type	Asset Entity ID	Asset Name	Asset Model Type	Asset Ownership Type	Type	Trade Date	Value	Currency
2	8627253	Living Trust ABC	Trust	8627256	Priority Capital	Custom Asset	Value Based	Commitment	2024-01-01	20000	USD
3	8627253	Living Trust ABC	Trust	8627256	Priority Capital	Custom Asset	Value Based	Contribution	2024-03-01	20000	USD

This import example would create two distribution transactions for Important Capital, which is owned by the Smith Family Trust. The first is a generic distribution and the second is a return of capital.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
1	Direct Owner Entity ID	Direct Owner Name	Direct Owner Model Type	Asset Entity ID	Asset Name	Asset Model Type	Asset Ownership Type	Type	Trade Date	Value	Currency	Generic	Return of Capital	Tag 1	Tag 2
2	8627253	Smith Family Trust	Trust	8665060	Important Capital	Custom Asset	Value Based	Distribution	2024-04-15	10000	USD	10000		Charitable gift	Client-directed
3	8627255	Smith Family Trust	Trust	8665060	Important Capital	Custom Asset	Value Based	Distribution	2024-05-01	15000	USD		15000		

This import example would create three transactions on assets owned by Aaron Smith: a buy of Stock A, a sell of Mutual Fund A, and a conversion for a bond.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N
1	Direct Owner Entity ID	Direct Owner Name	Direct Owner Model Type	Asset Entity ID	Asset Name	Asset Model Type	Asset Ownership Type	Type	Trade Date	Value	Units	Currency	Removed Entity ID	Removed Units or Received Value
2	8627056	Aaron Smith	Client	3384495	Stock A	Stock	Share Based	Buy	2024-07-01	1200	2	USD		
3	8627056	Aaron Smith	Client	3433416	Mutual Fund A	Mutual Fund	Share Based	Sell	2024-11-15	15000	10			
4	8627056	Aaron Smith	Client	1420194	International Corp	Bond	Share Based	Conversion	2024-11-15	8000	5		67232	2
