Find answers to common questions with Reporting.

In this guide:

- Data and reporting
  - Why doesn't my table data match my analysis views?
  - My report is missing investments, but they should be there.
  - Why does my chart say "No data is available"?
  - When I edit a table, all my data is missing.
  - Why do my numbers change when I run a report for the same time period on a different day?
- Generating and saving reports
  - Why did my report fail to run?
  - Why is my report getting stuck on a spinning wheel?

- Pages and section templates
  - Why can't I delete a section template?
  - How do I add page numbers to all pages of my report?
- Headers and footers
  - Why won't my headers and/or footers save?
  - Why have all my report headers disappeared?
  - Can I change the format of page numbers in my footers?

## Data and reporting

### Why doesn't my table data match my analysis views?

The data in your report table may differ from your analysis due to your settings. Check the filters, groupings, and time periods in both. Also, make sure you've saved any changes to your view and check if summary data is being used.

### My report is missing investments, but they should be there.

Investments might be missing from your report if:

- "Hide previous holdings" is selected
- Filters are applied to the section template

You can review these settings in the **Report Editor** or **Section Template Editor.** Adjust or remove any filters that could exclude the investments you want to use.

### Why does my chart say "No data is available"?

Usually, "No data available" in your chart means one of these might be off:

- Filters on the chart or section
- The selected time period
- The chart's groupings or metrics

- The data itself (it might not exist for those settings)

Check these settings to make sure they match the data you expect to see.

**When I edit a table, all my data is missing.**

Your data might be hidden by filters set on the section template that the table uses. These filters control the data shown in the table.

**Check for filters:** Open the **Section Template Editor** for your report. From the right-side panel, scroll to the **Filters** section. Adjust or remove any filters that could be hiding your data.

**Why do my numbers change when I run a report for the same time period on a different day?**

There are two main causes for report numbers that change on different days:

1. **Data updates:** Our system updates data daily. That includes corrections and retroactive data added by your team, like fund valuations. Reports use the latest data available for the reporting period. So running the same report on different days can show different results.
2. **Time period:** The time period you choose determines the data to include in your report. Say you selected month-to-date as the time period. That report will show different numbers each day as the month progresses.

# Generating and saving reports

**Why did my report fail to run?**

There are a few reasons that could cause this:

- **Unexpected errors:** This can happen due to issues with the data or report size. Check the **Not generated** tab to find any affected portfolios.

- **Split attributes with a lot of values:** Say a section uses a split attribute. If the selected portfolio has too many values for that attribute, then the report could fail.

### Why is my report getting stuck on a spinning wheel?

Reports can sometimes get stuck while editing or saving. Often because of a temporary glitch, large report size, or connection problem.

If it’s been more than an hour, try refreshing your browser. You can do this by clicking the **Refresh** button (usually an arrow in a circle) in your browser window.

**Important:** Refreshing your browser will erase any unsaved changes you’ve made. That's why it's always a good idea to save your work *regularly* while building your report. This prevents losing any progress if there's a problem.

# Pages and section templates

### Why can’t I delete a section template?

The most common reasons for this are a lack of permission or if the template is used in other reports. If you've already checked those, then it could be a firm setting for your reports.

#### Check your firm's report settings

1. Go to **Firm Administration** > **Report settings**.
2. Click **Settings** (gear icon) next to the report.
3. Under **Access** and **Firm**, uncheck the box to require this section in all reports.
4. Click **Save**.

### How do I add page numbers to all pages of my report?

You'll need to edit the header or footer to add page numbers to all report pages.

1. Open the report in the **Report Editor**.
2. Double-click on the header or footer where you want the page numbers to appear.
3. In the right-side panel, click **Header/Footer settings**.
4. Set your access to **Firm** and **require in all reports**.
5. Click **Save**.

**Note:** If you add page numbers in a header, they'll only show in that specific section. Be sure to add that header to each section so the page numbers show throughout the report.

# Headers and footers

### Why won’t my headers and/or footers save?

Your headers or footers may not be saving for a few reasons:

- **Didn't save it:** Remember to click **Save** in the **Report Editor** after making changes.
- **Required setting:** Your firm might require a specific header or footer. Ask your firm's admin for details.
- **Shared header or footer:** If it's used in other reports, you'll need to confirm the changes before saving.
- **Permissions:** You might not have permission to edit it.
- **Technical issue:** Try refreshing your browser.

### Why have all my report headers disappeared?

Firms can require headers or footers in reports. When this setting is on, all related reports will include the header or footer. If the setting gets turned off, those headers or footers will disappear from your reports.

### Check your firm's report settings

1. Go to **Firm Administration** > **Report settings**.
2. On the **Headers and footers** tab, see if there are any required headers or footers.

If a header or footer was removed, ask your firm's admin for more details.

### Can I change the format of page numbers in my footers?

Yes, you can. Click on the **footer** to open the right-side panel. On the **Page number** tab, you can pick a format and choose what page in your report to start numbering.

Keep in mind that your firm can set page numbering to start on a certain page in a report. In that case, the first few pages will use any previous formatting no matter what you choose.
