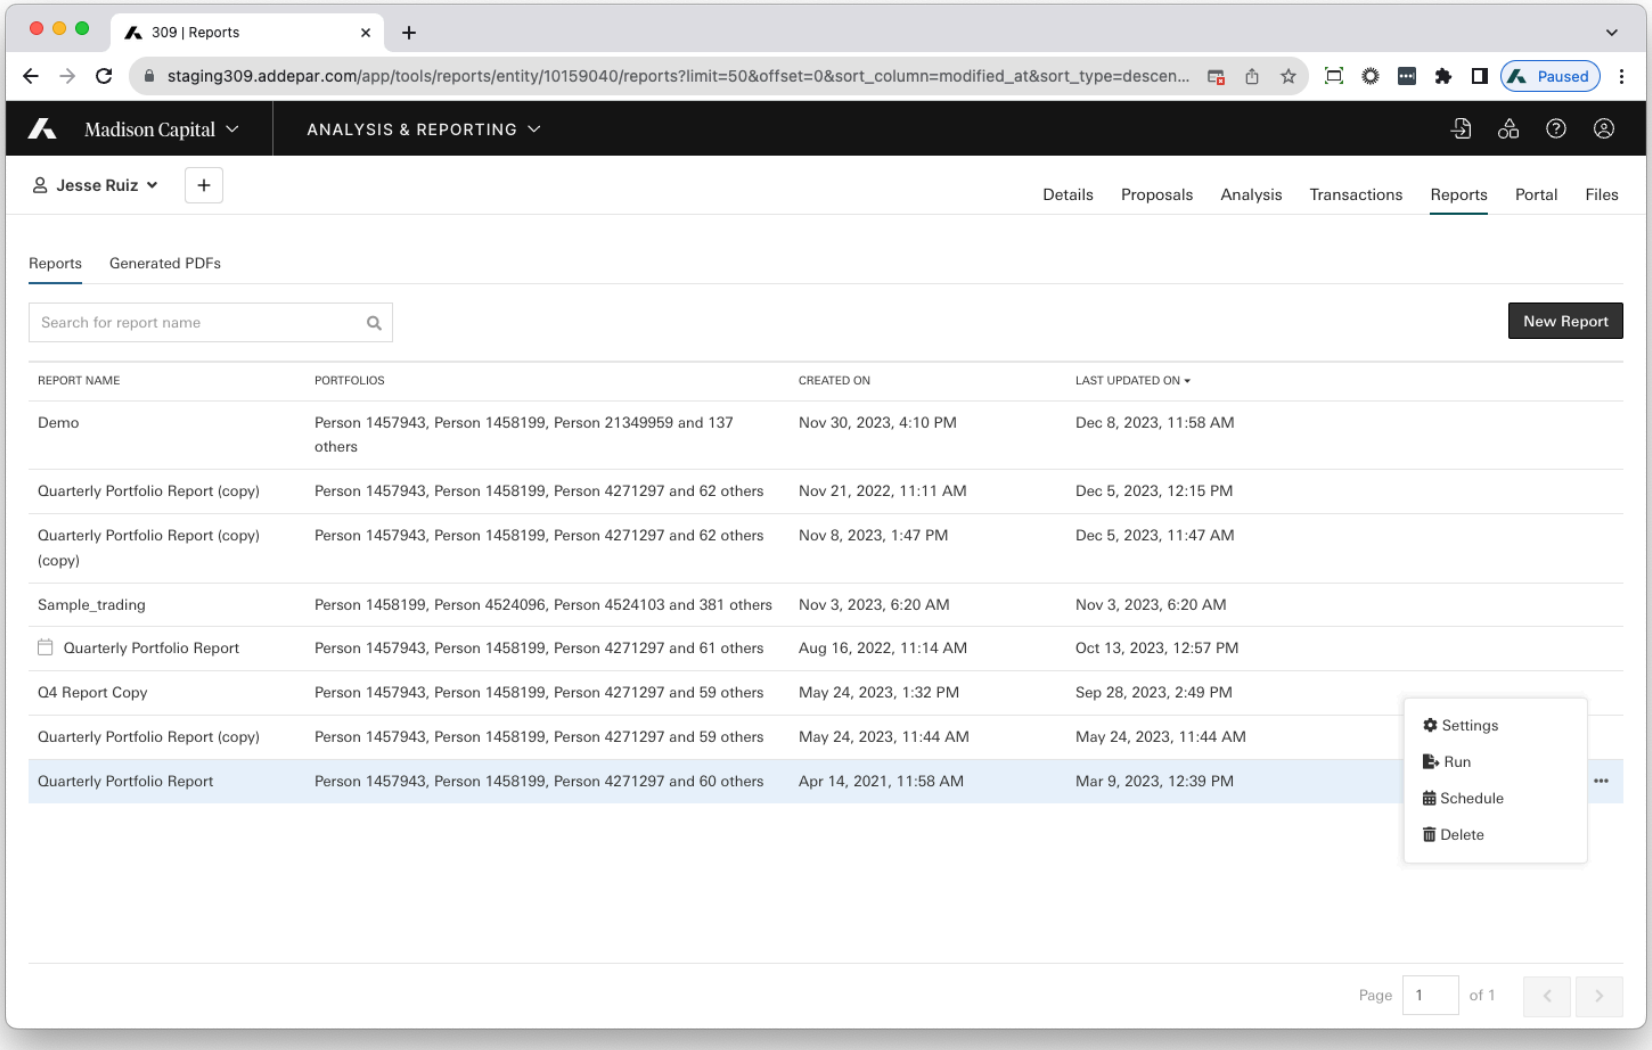
- Schedule reports
- Delete schedules

If your firm runs a report on a regular cadence, you can schedule the report so that you don't have to run or publish it yourself manually. This can be especially helpful if the report is large, complex, or associated with several portfolios. You can also automatically share documents that don't need explicit review, like weekly balance reports. Scheduling makes reporting more predictable for your clients and firm users.

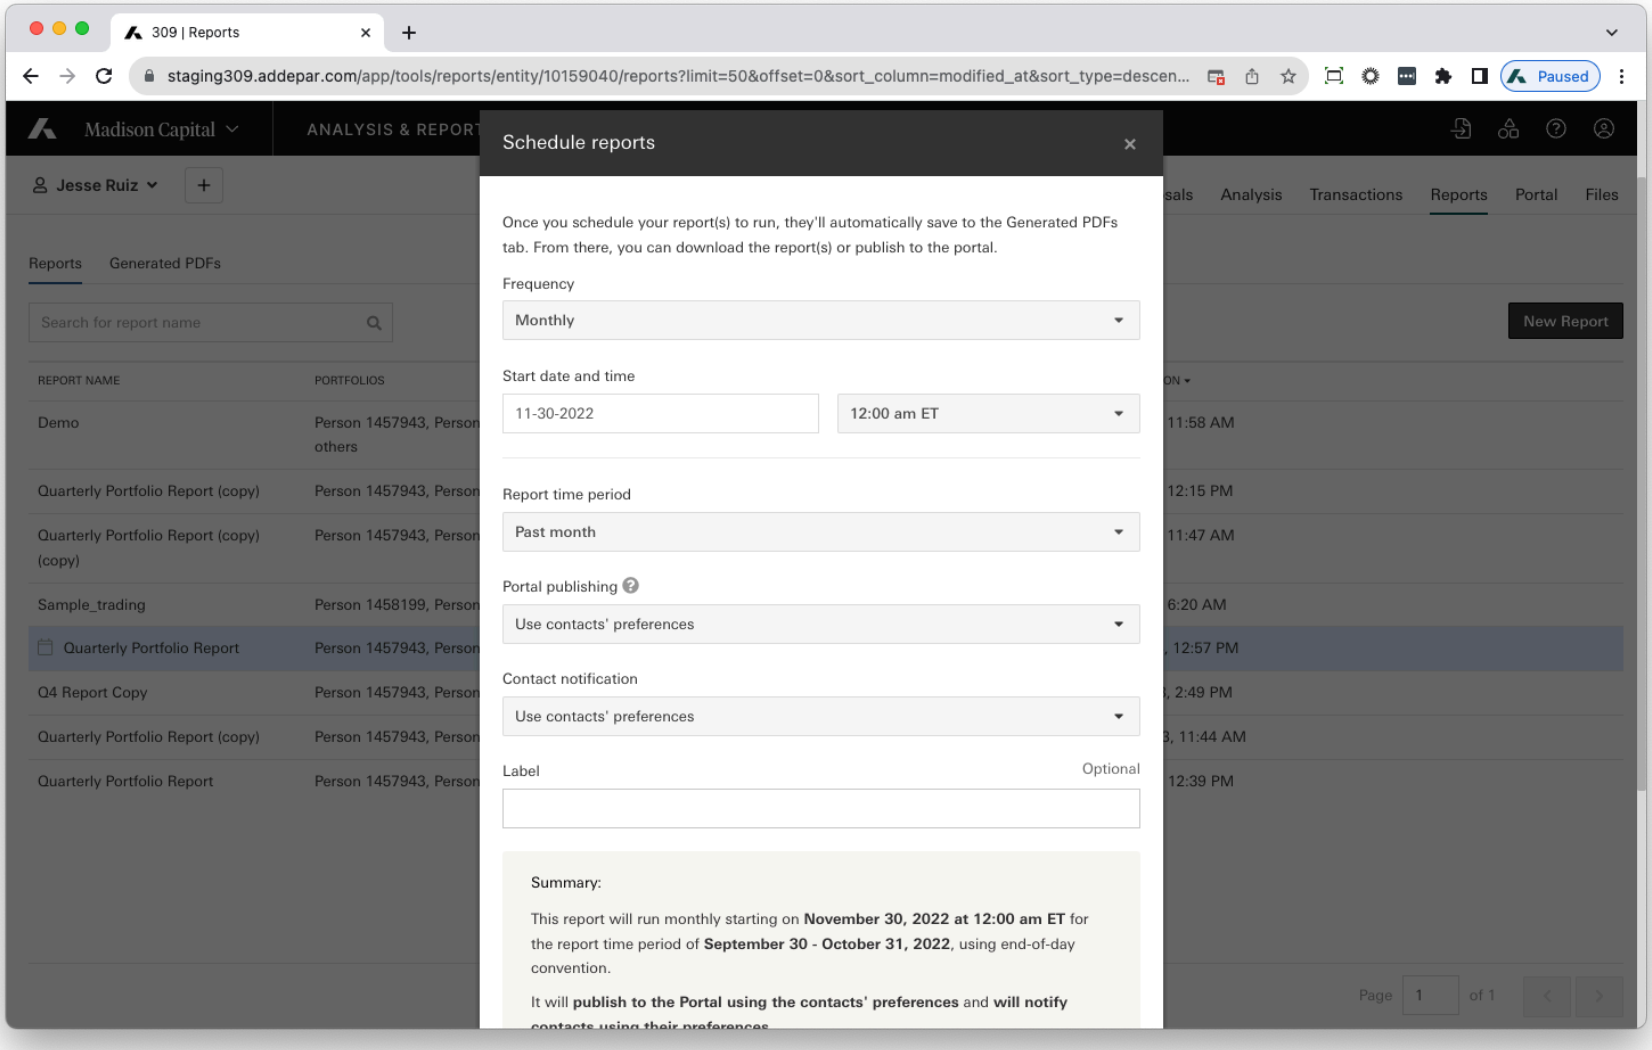
To schedule running reports, you must have permission to run reports and set up scheduled reports. Additionally, to schedule publishing reports to the Client Portal, you must have permission to share client files.

Schedule reports

1. Select one of the portfolios associated with the report, and go to Reports.
2. Hover over the report row, click the ellipsis icon, and click **Schedule**. You can also schedule a report from the Report Editor by clicking **Schedule**.



3. Choose how frequently you'd like the report to run under the Frequency drop-down. See the table below for frequency options and corresponding descriptions.



4. Select the start date and time the report will run. Your start date and time must be in the future. The report will run on the corresponding calendar date in future months or quarters. For example, if you first run a quarterly report on April 12, the

next quarterly report will run on July 12.

Frequency	Description	Example
Do not schedule	Report isn't scheduled to run.	N/A - The Summary box won't appear for this selection.
Once	Report runs one time on the start date.	If a report is scheduled to run once and the run date is October 15, 2020, it will run once on that day and won't continue to run.
Daily	Report runs every day from the start date.	If a report is scheduled to run daily and the first run date is October 15, 2020, it will continue to run every day, including weekends. Next run date: October 16, 2020
Weekly	Report runs every week on the same day of the week as the start date.	If a report is scheduled to run weekly and the first run date is Thursday, October 15, 2020, it will run every Thursday. Next run date: Thursday, October 22, 2020
Monthly	Report runs every month on the same day of the month as the start date.	If the report is scheduled to run monthly and the first run date is October 15, 2020, it will run on the 15th day of every month. Next run date: November 15, 2020

Quarterly	Report runs every three months on the same day of the month as the start date.	If the report is scheduled to run quarterly and the first run date is October 15, 2020, it will run on the 15th day of every third month. Next run date: January 15 2021
Semi-annually	Report runs every six months on the same day of the month as the start date.	If the report is scheduled to run semi-annually and the first run date is October 15, 2020 it will run on the 15th day of every sixth month. Next run date: April 15, 2021
Annually	Report runs every year on the same day of the year as the start date.	If the report is scheduled to run annually and the first run date is October 15, 2020, it will run on the 15th day of every year. Next run date: October 15, 2021

5. Choose the time period you'd like the report's data to reflect under the Report Time Period drop-down. See the table below for time period options and descriptions.

When choosing the time period, you should be confident that the data you want to include will be available at the time the report is scheduled to run. To reduce the potential for error, Addepar recommends scheduling reports to run at least one week after the end of the time period.

> ***Note:*** *Be mindful of Addepar's end-of-day convention. For example, to run a report for the past month of April, the time period should span from March 31 - April 30.*

Time period	Description	Example
Past month	Pulls data from the first day to the last day of the previous calendar month.	If the report runs on October 15: August 31 - September 30
Month-to-date	Pulls data from the first day of the current calendar month to the report run date.	If the report runs on October 15: September 30 - October 15
Past quarter	Pulls data from the first day to the last day of the previous calendar quarter.	If the report runs on October 15 (pulling Q3 data): June 30 - September 30
Quarter-to-date	Pulls data from the first day of the current calendar quarter to the report run date.	If the report runs on October 15 (pulling Q4 data): September 30 - October 15
Past year	Pulls data from the first day to the last day of the previous calendar year.	If the report runs on October 15, 2020: December 31, 2019 - December 31, 2020
Year-to-date	Pulls data from the first day of the current calendar year to the report run date.	If the report runs on October 15, 2020: December 31, 2019 - October 15, 2020

Static	Pulls data from the date range you specify.	If the report runs on October 15, and you specify the date range to be August 25 - October 1: August 25 - October 1
Relative	Pulls data for the last [insert number] of complete calendar day(s), week(s), month(s), quarter(s), or year(s).	If the report runs on October 15, 2020, and you specify 3 years: December 31, 2016 - December 31, 2019
Trailing	Pulls data for the last [insert number] of day(s), week(s), month(s), quarter(s), or year(s) relative to the report run date.	If the report runs on October 15, 2020, and you specify three years: October 15, 2017 - October 15, 2020

6. Select whether PDFs should be automatically published to contacts in the Client Portal. You can publish to all affiliated contacts, or publish depending on each contact's preference.
7. If the schedule automatically publishes PDFs to the Client Portal, select whether contacts should be notified by email. You can notify all contacts, or depending on each contact's notification preference. You can also add labels to the report.
8. Review the Summary box to confirm all the selections you made.
9. Click **Save**.

In the Reports tab, all reports that are scheduled to run will be marked with a calendar icon. Hover over the icon to see how frequently the report will run and when it will next run.

Reports published from Reporting to the Portal go to the file structure's top level.

Delete schedules

To delete a report's schedule:

1. Select a portfolio, and go to the Reports tab.
2. Hover over the report you want to delete the schedule for and click on the ellipsis icon.
3. Click **Schedule**.
4. Change the frequency to "Do not schedule."
5. Click **Save**.
